

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listings, of claims in this application.

Listing of Claims

Claim 1 (currently amended): An individual wrapping container for wrapping individually an interlabial pad to be held between labia, comprising:

a main body for containing said interlabial pad; and

~~and~~ a cover that covers a part of said main body, the cover forming an unwrapping portion at an end edge portion to be unwrapped to open the individual wrapping container;

wherein said cover is shaped to have a cut off portion at a place where said individual wrapping container is held when the individual wrapping container is opened, and

wherein the individual wrapping container has predetermined region where a finger of a wearer is applied, and

said end edge of said cover is curved or beveled to a bottom of the individual wrapping container.

Claim 2 (canceled).

Claim 3 (withdrawn): An individual wrapping container for wrapping individually an interlabial pad to be held between labia, comprising:

a main body containing said interlabial pad and

a cover that covers a part of said main body, the cover forming an unwrapped portion at an end edge portion to be unwrapped to open the individually wrapping container;

wherein a surface of said main body has an instruction to show where said individual wrapping container is held when opening the individual wrapping container is unwrapped.

Claim 4 (withdrawn): An individual wrapping container according to claim 3, characterized in that said instruction is made visual or touchable.

Claim 5 (currently amended): An individual wrapping container for wrapping individually an interlabial pad to be held between labia, comprising:

a main body for containing said interlabial pad and
a cover which overlaps on a part of the main body, the cover having an edge portion forming an unwrapping portion to unwrap said individual wrapping container;
wherein the main body has a fine projection ~~at least on~~ an internal surface of said main body, and
said end edge of said cover is curved or beveled to a bottom of the individual wrapping container.

Claim 6 (currently amended): An individual wrapping container according to claim 1, wherein said individual wrapping container comprises a container ~~on which a series of sheets for wrapping is wound~~, and

wherein said cover comprises an overlapping portion that is formed by overlapping both ends of a wrapping sheet and a vicinity of said both ends, and
wherein said unwrapping portion comprises one end of said wrapping sheet, and
wherein said individual wrapping container is unwrapped by unfolding said overlapping portion from said unwrapping portion.

Claim 7 (withdrawn): An individual wrapping container according to claim 6 comprising:
an unwrapping portion for sealing the interlabial pad, and
a bottom line on the opposite side;
wherein the dimension of the main body becomes smaller as it proceeds from said bottom line to said unwrapping portion.

Claim 8 (previously presented): An individual wrapping container according to claim 1, wherein said individual wrapping container is provided with a re-sealable sealing means on a portion where said cover and said main body are brought into contact.

wherein a dimension in the longitudinal direction of said individual wrapping container is in a range of 105 -- 130% of a dimension in the longitudinal direction of said interlabial pad.

Claim 13 (withdrawn): A wrapping body according to claim 10, wherein the dimension in said lateral direction of said individual wrapping container is set in a range of 105 -- 130% of the dimension in the lateral direction of said interlabial pad.

Claim 14 (currently amended): An individual wrapping container for individually wrapping an interlabial pad to be held between labia, comprising;

a main body including said interlabial pad and

a cover which overlaps a part of said main body, the cover having an end edge portion forming an unwrapping position to unwrap the individual wrapping container,

wherein said cover and said main body are lightly bonded each other at both end portions in a perpendicular direction to an unwrapping direction of the individual wrapping container, said cover is shaped to have a cut off portion at a place where said individual wrapping container is held when the individual wrapping container is opened, and

~~wherein said cover has an angular shape extending toward both sides of said main body from one part of said unwrapping part as a vertex~~ a center part of said end edge protrudes by curving or beveling said end edge of said cover.

Claim 15 (withdrawn): An individual wrapping container for individually wrapping an interlabial pad to be held between labia, comprising:

a main body containing said interlabial pad and

a cover which overlaps a part of said main body, the cover having an end edge portion forming an unwrapping part for unwrapping said individual wrapping container, and

wherein said cover and said main body are lightly bonded each other at both ends in a perpendicular direction to an unwrapping direction of the individual wrapping container, and

wherein an angle is made by a light-bonded line at both ends where the light-bonding is made and a non-bonded edge line where the light-bonding is not made, the angle which is made on a place other than the cover being an acute angle.

Claim 16 (withdrawn): An individual wrapping container according to claim 14, comprising: an angle formed between a lightly-bonded line at both end portions and a non-bonded edge line of said cover,

wherein the angle formed on a place other than the cover is an acute angle.

Claim 17 (withdrawn): A wrapping body according to claim 11, wherein the dimension in said lateral direction of said individual wrapping container is set in a range of 105 -- 130% of the dimension in the lateral direction of said interlabial pad.

Claim 18 (new): An individual wrapping container for wrapping individually an interlabial pad to be held between labia, comprising:

an end edge of a cover; and

a center part of the end edge protrudes by curving and beveling to the bottom of the main body in a perpendicular direction to an unwrapping direction of the cover,

wherein the end edge of the cover and a side extending parallel to the direction of unwrapping the cover form an angle, and the angle is formed on a place other than the cover is an acute angle.
